Outcome	Related Foundational Studies or Graduate
	Goal
Critical Thinker—Demonstrate purposeful thinking, intellectual	
integrity, solid reasoning and creative problem solving as the	
basis for making decisions and clinical judgments.	
1.1 Demonstrates Critical Thinking: Demonstrates critical	Foundational Studies 2:
thinking in making decisions, clinical judgment, and in	Critically evaluate the
problem solving.	ideas of others.
1.2 Synthesize Knowledge: Synthesizes theoretical and	Foundational Studies 2:
empirical knowledge from the sciences, humanities, and	Critically evaluate the
nursing organizations, planning, and providing care in	ideas of others.
collaboration with individuals, families, groups, and	
communities	
1.3 Select Appropriate Alternatives: Selects appropriate	
alternatives when considering solutions to identified	
health needs of individuals, families, groups, and	
communities.	
1.4 Analyzes Diverse Viewpoints: Analyzes diverse	Foundational Studies 2:
viewpoints in the interpretation of data and in	Critically evaluate the
determining conclusions.	ideas of others.
Communicator—A communicator who incorporates goal	
directed and focused dialogue into nurseclient interaction,	
demonstrates effective listening, reading, writing and speaking	

	1
skills, and uses technology appropriately to facility management	
of information.	
2.1 Therapeutic Communication Skills: Incorporates	Foundational Studies 10:
therapeutic communication skills in interactions with	Express themselves

2.4 Utilizes Technology: Utilizes technology for seeking,	
sorting, selecting, and presenting relevant information.	
Provider of Care—A provider of care who assumes a variety of	
roles in the delivery of holistic, competent, and culturally	
sensitive nursing care in multiple settings.	
3.1 Assess Wellness, Health Needs and Risks: Assess	
wellness, health needs, and risks of individuals, families,	
groups, and communities.	
3.2 Provides Diverse Interventions: Provides holistic,	
culturally sensitive, safe, and effective therapeutic nursing	
interventions in collaboration with individuals, families,	
groups, and communities in multiple settings.	
3.3 Education of Patients: Educates individuals, families,	
groups, and communities about wellness, disease/illness,	
medicaltechnical aspects, symptom management,	
self-care management, resource management, and	
alternative methods of healing.	
3.4 Evaluates Client Outcomes: Evaluates client outcomes	
and the effectiveness of professional nursing practice.	
3.5 Revises Plan of Care: Revises plan of care as	
appropriate in collaboration with individual, family, group,	
and interdisciplinary health care team.	
• •	1

	<u> </u>
3.6 Evaluates Research: Evaluates research and evidence	
based information for application to nursing.	
Leader—A leader who provides responsible direction in the	
management of human, fiscal and material resources necessary	
for achieving quality health care outcomes.	
4.1 Assume a Leadership Role: Assumes a leadership role	
in guiding members of the interdisciplinary health care	
team	
4.2 Adopts a ConsumerOriented Approach: Adopts a	
consumeroriented approach in the delivery of cost-	
effective care.	
4.3 Prioritizes Therapuetic Goals: Prioritizes therapeutic	
goals for providing quality care in collaboration with	
individuals, families, groups, and communities.	
4.4 Compares the Connection Between Resources:	
Compares the connection between human, fiscal, and	
material resources required for providing care.	
4.5 Delegates Appropriate Functions: Delegates	
appropriate functions to licensed and nonlicensed	
caregivers in a manner consistent with the Indiana Nurse	
Practice Act.	
4.6 Performs Supervision Activities: Performs selected	
supervision activities related to the actions of licensed and	
nonlicensed caregivers.	
Professional—Demonstrate accountability and responsibility for	
nursing judgments and actions within an ethical and legal	
framework.	
5.1 Ethical and Legal Framework: Practices within an	
ethical and legal framework and standards of professional	
nursing practice.	
5.2 Accountability and Responsibility: Demonstrates	
accountability and responsibility for one's own actions,	
clinical judgments, and decisionmaking.	
5.3 Ethical and Legal Decision Making: Demonstrates	
ethical and legal decision-making surrounding health care	
dilemmas.	
5.4 Organizational Confidentiality: Protects client and	
organizational confidentiality.	
Life Long Learner—A student who adapts changes related to	
culture, ecology, economics, politics and the expansion of	
scientific knowledge and technology.	
solentino kilowicaje ana teciniology.	

6.1 Cultural Beliefs, Values, and Practices: Considers how cultural beliefs, values and practices influence the Health Care of Individuals, families and groups and communities.  6.2 Ecological Factors, Economics, and Politics: Analyzes how ecological factors, economics and the political arena, shape health care policies and delivery of care.  6.3 Maintain Current Knowledge: Assumes responsibility to maintain current Knowledge in professional nursing practice by articulating a plan for life-long learning.  6.4 Promotes Excellence Through Education: Promotes excellence in nursing through regular attendance at educational activities designed to expand knowledge and competencies.  Advocate—An advocate who promotes health care policy, finance, and regulatory environments for individuals, families, and communities.  7.1 Participation in Activities: Participates in activities to improve health care practices and policies.  7.2 Advocate for Policy Changes: Advocates for policy changes that promote health for individuals, families, groups, and communities.  7.3 Understand Policy Development: Analyzes the role of the nurse policy developer in a variety of health care settings.  Coordinator of Community Resources—A coordinator who collaborates with members of the interdisciplinary healthcare team in multiple settings.  8.1 Coordinates Care with Interdisciplinary Members: Coordinates care with members of the interdisciplinary health care team form a variety of health care settings.  8.2 Accessing Community Resources—Assists individuals, families, groups, and communities in accessing community resources to meet health needs.  8.3 Refer to Services and Programs—Refers individuals, families, groups, and communities to services and		1
Care of Individuals, families and groups and communities. 6.2 Ecological Factors, Economics, and Politics: Analyzes how ecological factors, economics and the political arena, shape health care policies and delivery of care. 6.3 Maintain Current Knowledge: Assumes responsibility to maintain current Knowledge: Assumes responsibility to maintain current Knowledge in professional nursing practice by articulating a plan for life-long learning. 6.4 Promotes Excellence Through Education: Promotes excellence in nursing through regular attendance at educational activities designed to expand knowledge and competencies.  Advocate—An advocate who promotes health care policy, finance, and regulatory environments for individuals, families, and communities.  7.1 Participation in Activities: Participates in activities to improve health care practices and policies.  7.2 Advocate for Policy Changes: Advocates for policy changes that promote health for individuals, families, groups, and communities.  7.3 Understand Policy Development: Analyzes the role of the nurse policy developer in a variety of health care settings.  Coordinator of Community Resources—A coordinator who collaborates with members of the interdisciplinary healthcare team in multiple settings.  8.1 Coordinates Care with Interdisciplinary Members: Coordinates care with members of the interdisciplinary health care team form a variety of health care settings.  8.2 Accessing Community Resources—Assists individuals, families, groups, and communities in accessing community resources to meet health needs.	6.1 Cultural Beliefs, Values, and Practices: Considers how	
6.2 Ecological Factors, Economics, and Politics: Analyzes how ecological factors, economics and the political arena, shape health care policies and delivery of care.  6.3 Maintain Current Knowledge: Assumes responsibility to maintain current Knowledge: Assumes responsibility to maintain current Knowledge in professional nursing practice by articulating a plan for life-long learning.  6.4 Promotes Excellence Through Education: Promotes excellence in nursing through regular attendance at educational activities designed to expand knowledge and competencies.  Advocate—An advocate who promotes health care policy, finance, and regulatory environments for individuals, families, and communities.  7.1 Participation in Activities: Participates in activities to improve health care practices and policies.  7.2 Advocate for Policy Changes: Advocates for policy changes that promote health for individuals, families, groups, and communities.  7.3 Understand Policy Development: Analyzes the role of the nurse policy developer in a variety of health care settings.  Coordinator of Community Resources—A coordinator who collaborates with members of the interdisciplinary healthcare team in multiple settings.  8.1 Coordinates Care with Interdisciplinary Members: Coordinates care with members of the interdisciplinary health care team form a variety of health care settings.  8.2 Accessing Community Resources—Assists individuals, families, groups, and communities in accessing community resources to meet health needs.  8.3 Refer to Services and Programs—Refers individuals,	cultural beliefs, values and practices influence the Health	
how ecological factors, economics and the political arena, shape health care policies and delivery of care.  6.3 Maintain Current Knowledge: Assumes responsibility to maintain current Knowledge in professional nursing practice by articulating a plan for life-long learning.  6.4 Promotes Excellence Through Education: Promotes excellence in nursing through regular attendance at educational activities designed to expand knowledge and competencies.
